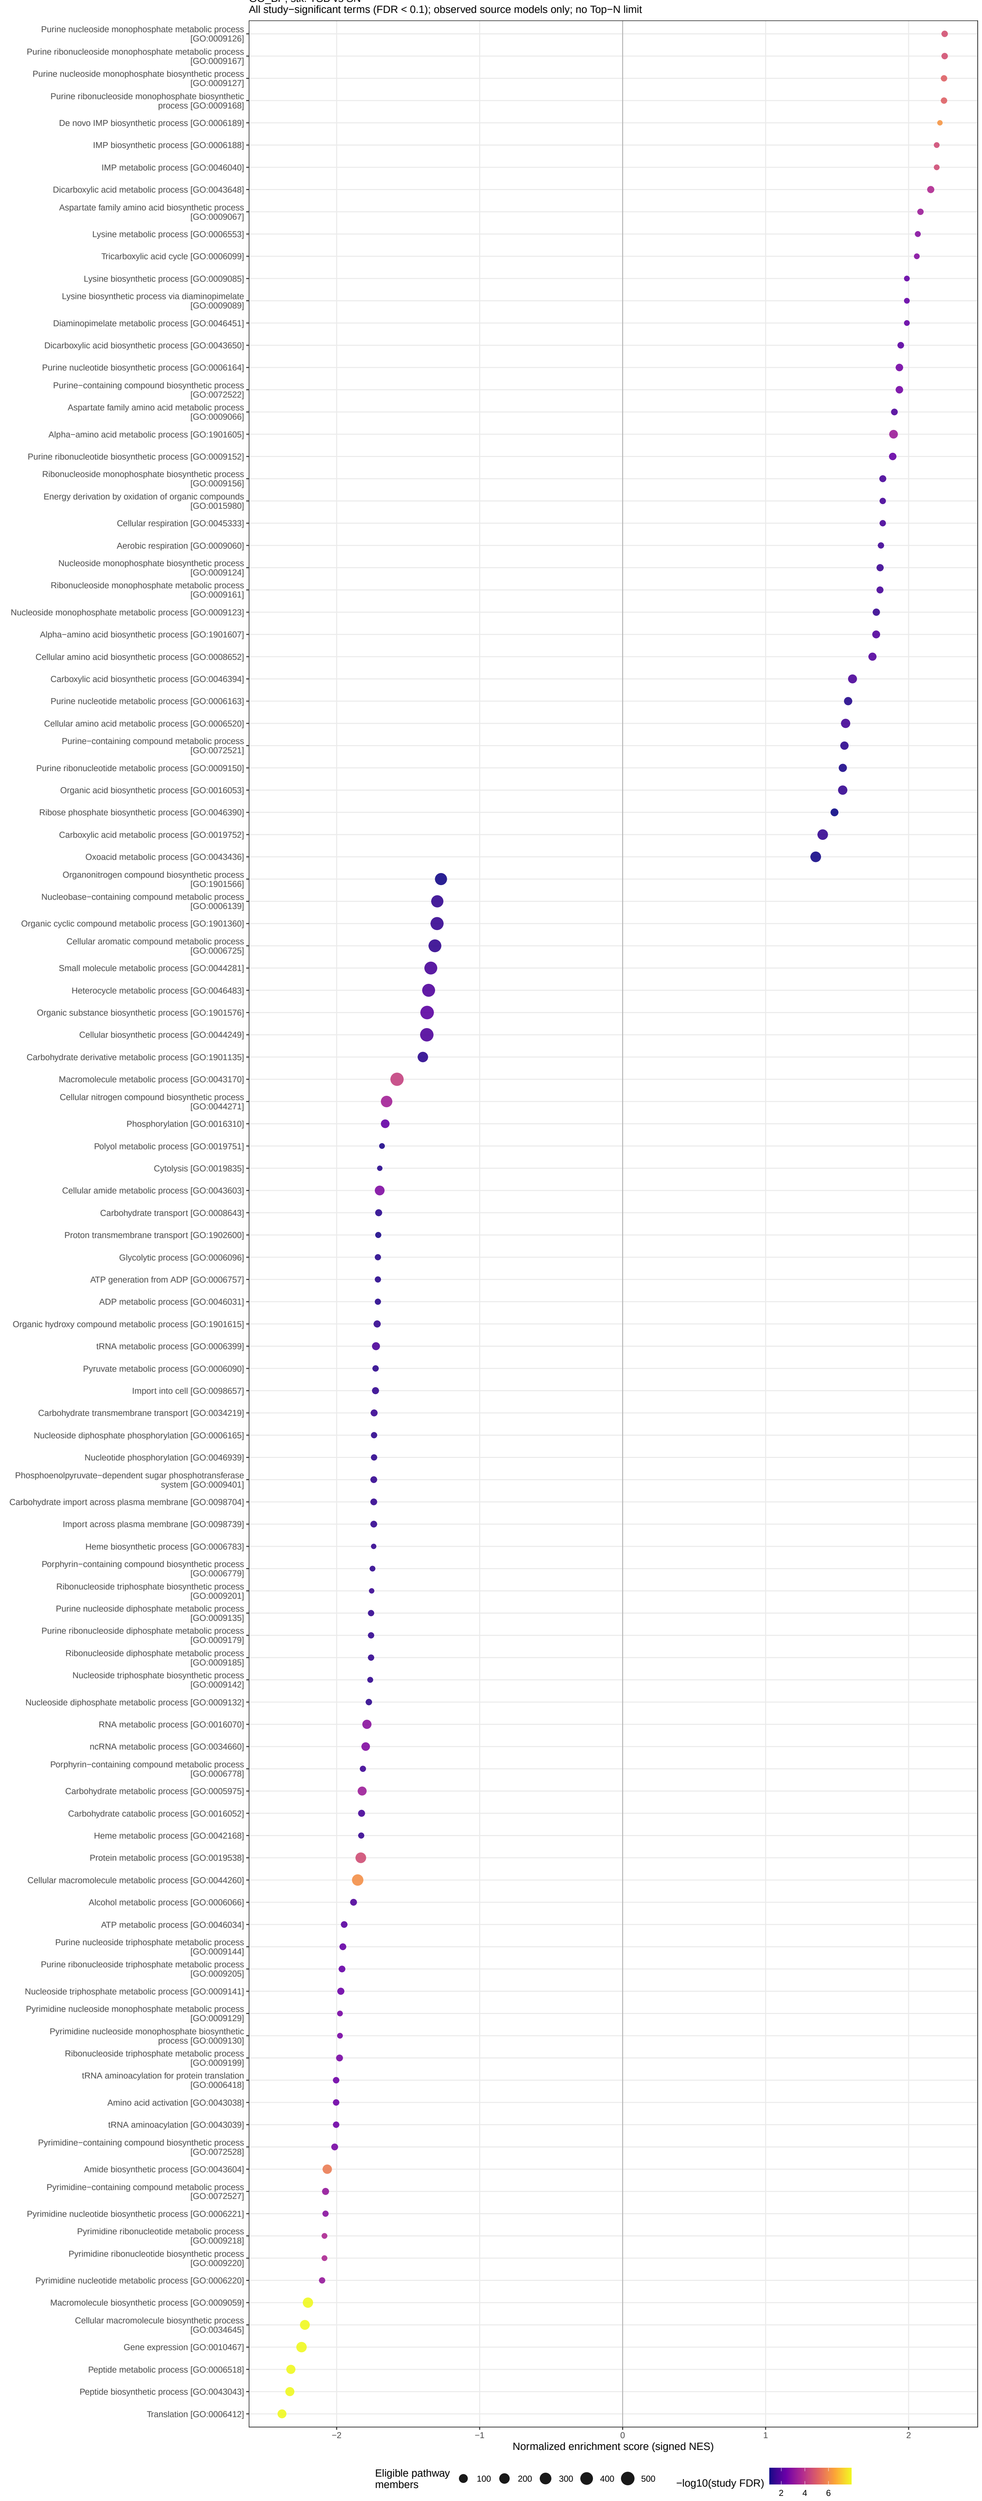
GSEA functional enrichment

GO_BP; stk: TSB vs SN
All study−significant terms (FDR < 0.1); observed source models only; no Top−N limit



Rows: largest positive NES to most negative NES. stk: TSB vs SN: NES > 0 = Higher in TSB; NES < 0 = Higher in SN.
Source lod_imputed models excluded before enrichment; no minimum−replicate filter added. Enrichment is not a direct measure of pathway activity.
