ORA functional enrichment
KEGG; stp: TSB vs SN
All study−significant terms (FDR < 0.1); observed source models only; no Top−N limit
Higher in TSB
Citrate cycle (TCA cycle) [map00020]
beta−Lactam resistance [map01501]
Carbon metabolism [map01200]
Microbial metabolism in diverse environments [map01120]
Biosynthesis of secondary metabolites [map01110]

Rows within each direction: largest to smallest fold enrichment. Source lod_imputed models excluded before enrichment;
no minimum−replicate filter added. Categories can share proteins; enrichment does not establish direct kinase targets.
