Ranked functional enrichment
Top 10 terms per contrast passing FDR_study < 0.1
anc: TSB vs SN
NES > 0: Higher in TSB
NES < 0: Higher in SN
[KEGG] Ribosome
[KEGG] Purine metabolism
[KEGG] Citrate cycle (TCA cycle)
[KEGG] Aminoacyl−tRNA biosynthesis
[KEGG] Histidine metabolism
[KEGG] Biosynthesis of secondary metabolites
[KEGG] Glyoxylate and dicarboxylate metabolism
[KEGG] beta−Lactam resistance
[KEGG] Carbon metabolism
[KEGG] One carbon pool by folate

NES direction follows the declared signed ranking statistic. Enrichment does not measure pathway activity.
